# MOBILE APPLICATION

Mobiles technologies became one of the powerful gadgets in online business. Mobile apps are emerging with the concept of shops in hand where customers can buy, Sell, research and can make quick buying decisions at anywhere & anytime.

We understand these facts seriously to provide an application which makes your business reaches the maximum level in the mobile era. Our process starts from R&D of each & every requirement and provided the detailed UML diagram with a clear prototype. Our mobile consultants can come up with the suitable strategy with leading-edge design and a technical suggestion which helps you to understand what the process would be going on with your project in pre-initiation time.

It's hard without compromising on the quality works which incorporates Completeness, User-Friendly, Perfect tools, usability, and direction to submit applications to the app store, our team in InnoBlitz Technologies only give assurance and concentrate on the possible then develop winning applications with exact alignment at client expectations.

Technologies that we serve @ Innoblitz

Native and Hybrid Applications (Android, iOS, and Windows)

# UI & UX

We strongly believe that creative design is going to be a face value of any business and that's going to be brand value. Every brand should reflect the stand hold of their identity in the market. We analyze the core business and concept for the same with color combo, culture, targeted group, theme, and competitor study etc.,

Any design from our studio starts with a brainstorm and creates design board before we move to any design concept and identify the uniqueness of the business ideas to create the concepts.

UX is more than UI, UX will help to understand the core of the project structure and business modules involved in the project. UX serves a prototype of your entire project with making the UI part easy to apply the creative design to the derived UX. All the design should be converted in the perfect UI to fit into all the screen size we used in the present with 100% responsive and Browser compatibility. We innovate designs like Logos, Creative Banners, Corporate Kit, Exclusive Branding & Corporate Presentations, Web application UX & UI etc.

The tools that we use in our creative design, UX & UI

Adobe Photoshop, Illustrator, Corel Draw, Dreamweaver, FLASH, CSS, HTML 5, J-Query, and LightBox etc.

# OUR DEVELOPMENT METHODOLOGY

# ADVANTAGES

Innoblitz Technologies serving clients for more than 5 years and providing value-driven solutions by leveraging technology to enable our customer to reach their focused business growth. We empower our client's business by being a seamless extension of their IT team.

Our work does not end with developing the customer requirement. We help them to deploy and reach their real audience.

# ENGAGEMENT MODELS

We serve our clients through the use of several models for engagement that can be tailored to meet your specific needs. With InnoBlitz Technologies you can select the most convenient outsourcing model for your project and business needs.

## FIXED COST

In the fixed price model, InnoBlitz software engineers quote the project and we commit to fixed-price, fixed deadlines and fixed scope of work. This model is suited for projects with well-defined requirements. But even if you do not have a specification, you can hire our resource to elaborate on your requirements.

## TIME & MATERIAL

This model is well-suited for those who do not have well-defined requirements, need research work, or want ongoing software enhancements. Depending on your needs, you can send us tasks daily, weekly or upon completion of the previous tasks.

## DEDICATED TEAM

Dedicated Teams that work exclusively for your company. The model suits well for long-term relationships when staff retention is a key for keeping costs down.

# OUR CLIENTS

# Thank you!

## Let's move forward together
